

VX-PRO4

Racing Specialities

The Brand New VX-Pro4 evolved from the much loved VX-Pro3. Years of experience can be found in this ultimate off road helmet. The perfect choice for MX, Enduro or Off Road use.

Found in every Arai helmet, the basic & simple organic shell shape is based on the R75 Shape concept.

The Absence of exaggerated edges or protrusions on the shell is not a lack of creativity, but the commitment to maintaining the integrity of the shell, with real world impact performance.

Outer Shell

cLc (complex Laminare construction)

Contains a specially designed composite fibre that is sandwiched between the two layers of Super Fiber Laminare. The composite fibre acts as a reinforcement layer without adding significantly to the weight of the helmet

Ventilation

Easy to clean diffusers create a strong venturi vacuum at the rear. Centre top vent for increased air flow. Under-peak air intake collects and directs cool air to the helmet. Inner chin vent shutter prevents debris coming into the helmet in dusty riding conditions. Goggle ventilation and lower side vents.

Mouth Vent

Mounted from the outside to further improve penetration resistance. The one-piece, stainless steel mesh screen provides a durable barrier against roost while maximizing mud packing. The removable screen is easy to clean.

Dry-Cool® liner

The completely removable and washable Dry-Cool® interior lining is developed for and tested in MotoGP. It uses micro water cells to improve moisture and heat transfer from the head to the airflow and dries much faster than conventional textiles. Keeps your head cool and dryer during a long ride

Facial Contour System (FCS)

To offer an even better snug fit and enhancing the comfort to the lower jaw, the Facial Contour System (FCS) works with a foam spring support in the cheek pad that compresses and rebounds.

Innovative Peak

The Arai peak scavenges and forces air into the forehead for cooling.

Dirt Removal

Removal of vents and mouth vent enables the rider to clean mud or other objects with ease.

Goggle Band Guidance

Eye-opening side trim and rigid vent ducts
